## **Forward Looking Statements**

Certain statements made during this presentation, as well as included in this document, are not historical facts and may be considered "forward-looking statements" and are based on estimates, assumptions and projections which management believes are reasonable but by their nature subject to risks and uncertainties. The Private Securities Litigation Reform Act of 1995 provides a safe harbor for forward-looking statements.

The reasons which could cause actual results and/or financial condition to differ materially from those suggested by such forward-looking statements include but are not limited to those discussed or identified from time-to-time in AFG's filings with the Securities and Exchange Commission, including the annual report on Form 10-K and the quarterly reports on Form 10-Q. We do not promise to update such forward-looking statements to reflect actual results or changes in assumptions or other factors that could affect these statements.

Core net operating earnings is a non-GAAP financial measure which sets aside items that are generally not considered to be part of ongoing operations, such as net realized gains and losses, discontinued operations, as well as other significant items that are not able to be estimated with reasonable precision, or that may not be indicative of ongoing operations. AFG believes that this non-GAAP measure is a useful tool for investors and analysts in analyzing ongoing operating trends of AFG.

## **Department of Labor Proposal**

- In April 2016 the Department of Labor (DOL) issued the final version of its fiduciary rule that will
  impose additional requirements on the sale of certain annuities, including FIAs, to individual
  retirement accounts (IRAs).
- It is expected that all carriers will experience some impact when the rule takes effect in 2017, including temporary sales disruption during a transition period.
- Based on our analysis of the rule and discussions with our distribution partners:
  - We are planning for certain changes to our business model, including new products and compensation arrangements.
  - We believe these changes should allow most of our current distribution partners to continue to sell our traditional fixed and FIA annuities.
  - Many large National Marketing Organizations (NMOs) have filed to be classified as "Financial Institutions."
- About half of our sales are qualified and subject to the new rules.
  - We believe the biggest impact will be to non-registered reps in our Retail Channel (approximately 10% of our sales in Q2 2016).
  - We continue to believe that our business model makes us less vulnerable to the rule than many of our competitors.
- Based on our analysis, we do not believe the implementation of the final DOL rule will have a material impact on the Company's results of operations.
